

Sage 50 Accounts

Report Designer v1.3.2011.30 Update

This article explains how to download and install the Sage Report Designer v1.3.2011.30 update and, if required, the Server Side Reporting v1.3.2011.30 update for the use with Sage Accounts.

You can check your Report Designer version in Tools>Report Designer>Help>About>Application>File Version.

Note: If you use Server Side Reporting with your Sage Accounts software, after installing the Sage Report Designer v1.3.2011.30 update, before running any reports you must also install the Server Side Reporting v1.3.2011.30 update.

The Sage Report Designer v1.3.2011.30 update is designed for Sage 50 Accounts 2007 to 2012, Sage Instant Accounts v14 to v16 and Sage Instant Accounts 2011 and 2012. It resolves several issues including the following:

- Error codes 20, 30, 41 and other issues when running reports to PDF, HTML, XML, XLS or RTF files.
- Software hangs or no data is found when running customer statements and reminder letters, goods despatched notes and remittance layouts.
- Cannot create PDF files using a 64 bit operating system.
- Error: 'Could not load file or assembly System.enterpriseServices.wrapper.dll or one of its dependencies' when generating reports.
- When saving reports as PDF files, parts of the template are missing.
- Issues when trying to print more than one page of the same label.
- Expressions to calculate the percentage of a report total not working.
- Last item on an invoice layout appears at the very top of page two instead of below the group header.
- Miscellaneous folder missing from the Report Browser window.
- CSV file contains duplicate lines if report headers are included.
- Collate copies doesn't work when printing labels.

Sage 50 Accounts Report Designer v1.3.2011.30 Update
